

ENVIRONMENTAL POLICY

Bandvulc is committed to the care of the environment and the prevention of pollution. We acknowledge our responsibilities to ensure that all our operations are carried out with the minimum impact to the environment, and to comply with all applicable legal and other requirements to which we subscribe which relate to our environmental aspects.

We are committed to continually improve our environmental performance. This policy provides a framework for periodically setting and reviewing objectives and targets as part of that commitment.

Bandvulc's Environmental Policy is therefore as follows:

- Assess our activities, products and services with respect to their environmental aspects and impacts, and incorporate all practicable procedures and controls to prevent environmental damage and pollution.
- Minimise, control and as far as possible prevent the release of pollutants or other substances to air, water or land.
- Improve the efficiency of our operations by monitoring our consumption of energy and resource, and reducing, reusing or recycling waste materials.
- Introduce and maintain an Environmental Management System which conforms with ISO14001:2015

This policy is displayed on our company notice board(s) and communicated to all employees of the Bandvulc Group, along with their individual responsibilities, through appropriate training and awareness-raising. It is publicly available on request to customers, any person within the Bandvulc Group, and the general public.

This policy will be communicated throughout the organisation and to all interested parties. It will be reviewed annually to ensure the success of future Environmental Systems.

David Smith
Managing Director
